PATENT

Please amend the claims as follows:

112. (Currently Amended) [A method for providing computer suggested image processing, comprising:

identifying an attribute of a first image by a computer;
automatically selecting a new value, for a product attribute of an image-based product incorporating at least a portion of the first image, based on the image attribute; and
receiving an order for the image-based product having the product attribute including the automatically identified image attribute]

A method for automatically demonstrating a product feature associated with a plurality of image-based products, each image-based product having one or more product attributes, comprising:
receiving a first image from a user;
receiving a request for a demonstration of an image-based product by the user;
automatically selecting one of the plurality of image-based products by a computer;
automatically selecting at least one of the product attributes for the selected image-based product; and
automatically processing a first preview image of the selected image-based product having the selected product attributes using the image provided by the user.

113. (No change) The method of claim 112, further comprising:
displaying the first preview image of the image-based product.

114. (No change) The method of claim 113, wherein displaying the first preview image of the image-based product includes:
downloading the first preview image to a client computer; and
displaying the first preview image on the client computer.

115. (No change) The method of claim 112, further comprising uploading the first image from a client computer to a server using a computer network.

116. (No change) The method of claim 112, further comprising receiving a selection of the first image from a plurality of images.

117. (No change) The method of claim 112, wherein the attribute of the first image includes a color attribute of the first image.

118. (No change) The method of claim 112, wherein the attribute of the first image includes an image border attribute of the first image.

119. (No change) The method of claim 112, wherein automatically identifying the image attribute includes analyzing the first image.

120. (No change) The method of claim 119, wherein the new value for the product attribute is automatically selected based on the analysis of the first image.

121. (No change) The method of claim 119, wherein analyzing the first image includes generating a set of representative colors from the first image.
122. (No change) The method of claim 120, wherein automatically selecting the new value for the product attribute includes selecting a color as a function of at least one of the representative colors.
123. (No change) The method of claim 122, wherein selecting the color as a function of at least one of the representative colors includes selecting a color that matches at least one of the representative colors.
124. (No change) The method of claim 123, wherein selecting the color that matches at least one of the representative colors includes selecting a color that complements at least one of the representative colors.
125. (No change) The method of claim 122, wherein selecting the color as a function of at least one of the representative colors includes selecting the color from the set of representative colors.
126. (No change) The method of claim 125, wherein selecting the color from the set of representative colors includes selecting the most popular color.
127. (No change) The method of claim 125, wherein selecting the color from the set of representative colors includes selecting the color at random from the set of representative colors.
128. (No change) The method of claim 112, wherein the product attribute is a border color product attribute of the image-based product and the new value is the selected color.
129. (No change) The method of claim 128, further comprising generating a second preview image of the image-based product having a border, wherein the color of the border is the color specified by the border color product attribute.
130. (No change) The method of claim 112, wherein selecting a new value for the product attribute includes selecting the new value at random.
131. (No change) The method of claim 130, wherein the selection of the new value is constrained based on previous values of the product attribute.
132. (No change) The method of claim 112, wherein selecting a new value for the product attribute includes selecting the new value at pseudo-random.
133. (No change) The method of claim 112, wherein selecting a new value for the product attribute includes selecting the new value from a predetermined ordering of values.
134. (No change) The method of claim 112, wherein the product attribute relates to which images are incorporated in the image-based product, and the image-based product further incorporates at least a portion of a second image.

135. (No change) The method of claim 112, further comprising:
receiving a plurality of images;
automatically identifying an image attribute of each of the received images; and
automatically selecting the first and second images from the received images based on the image
attributes of the received images.

136. (No change) The method of claim 112, further comprising fulfilling the order for the
image-based product.
